10 February 1999

Dear Mr Gibb,

On behalf of all the designers, engineers, craftsmen and women at Bentley Motor Cars, I would like to take this opportunity to express our pleasure in delivering to you your new Bentley Turbo RT (LWB).

We know that our success is dependent on our customers and how well we fulfil their requirements. Our aim is to build a lifelong relationship with you. In partnership with our Authorised Dealers, we endeavour to offer levels of service comparable with the world's finest brands, and unequalled in the motor industry.

I therefore take great pleasure in enclosing an Owner Folio for your new motor car, which outlines our commitment to you and can be used as a reference file for the motor car throughout its life, passing from one owner to the next. In conjunction with the motor car's service record, the folio will give further assurance to subsequent owners of its history.

We would very much value any comments or feedback concerning your ownership experience. Our Customer Services Department in Crewe and Carsten Preisz in California will be in contact soon, but please do not hesitate to contact us should the need arise - numbers are included in the Folio.

We wish you great happiness as a Bentley owner, and thank you for buying one of our motor cars.

Yours sincerely

K M Sanders
Member of the Board, Sales and Marketing

Re: Bentley for Mr. Gibb

Dear Dick,

I have located a beautiful 1997 Turbo R finished in Black with sandstone hypes (a very light color with a hint of tannish color) piped in tan and tan dash. The car has only done 2,700 miles and is available for immediate delivery at only \$182,500.⁰⁰.

If timing is not critical, then I have something very special to recommend. As you know, the new Bentley Arnage has now been launched as a 1999 Model. I have one coming in early to mid August in Black with Cotswold hypes (like parchment) with a sunroof and veneer door panels at \$206,800.⁰⁰.

Even better, in my opinion would be to take delivery of the LAST EVER Bentley RT TURBO

to be delivered to North America. The factory had a few bodies left that they were going to scrap. They have been convinced to build

the motorcars and they will be built as 1999's. They are building for me, 8 Silver Spurs and 2 Bentley Turbo RT's. The RT's have the 400 HP engine that came out for the Continental T. This means that I will get the last Bentley and the last Rolls-Royce.

In my opinion, the 1998 cars were the best that they have ever built and they will be the last sedans to have a proper Rolls-Royce engine.

The color scheme for the last Bentley is exactly the scheme that Barry likes. I am also faxing a copy of the original factory order. I have not yet begun promoting these cars but I thought you should know about them. I have sold the 2nd to last Bentley and 2nd to last Rolls to another good customer of mine.

The last Rolls and Bentley will be complete with special tread plates commissioning them as the last car and very special presentation cases along with a "build book" detailing the car's birth from "body-in-white" to finished product in pictorial history. All the men at the factory

BRAMAN MOTORS, INC.

that work on the cars will sign the book.

If Barry would like that car, we could even have something engraved into the car expressing that it was built expressly for him.

If Barry wouldn't mind, I would even like to work something out to do a national press event with Rolls-Royce factory executives at the hand-over. It might even be good for Barry as a big media event.

If you have any questions, please call me at anytime. I will be away on Monday and Tues. morning but available through my cellular (954-415-9229) or message keeper (1-800-301-4098).

Sincerely,
Richard A. Kovacs
