EDL SERVICES, LLC

DATE	BODY SHOP - DESCRIPTION	HOURS
2/12	Installed new mechanical fuel pump, test -- no fuel getting to the carburetor. Remove all fuel lines leading from the gas tank. Inspect and blow compressed air through lines -- plugged up solid. Inspect junction block for fuel lines -- cannot pass compressed air through.	6
2/13	Removed all fuel lines to gas tank. Drained gas tank fully. Remove gas tank, remove sending unit, bench test sending unit, wire up sending unit to car while gas tank outside of car -- sending unit works. Made new gasket for sending unit and reinstalled in gas tank. Clear fuel lines fully and reinstalled in car.	7
2/14	Troubleshooting mechanical fuel pump, would not pump fuel to carburetor. Modified existing fuel lines and began installing a new electric fuel pump.	7
2/15	Mounted electric fuel pump, modified fuel hard line, added soft fuel line from the electric fuel pump to the gas tank. Installed new fuel filter in sending unit	6
2/16	Ran wiring to the electric fuel pump. Test electric fuel pump -- works great. Checked fuel system for possible leaks -- no leaks, all good. Resolved oil leak at the oil filter. Re-route electrical line for the oil pressure sending unit. Replaced oil filter. Tightened main oil fitting at the oil pan. Check brake lights -- not working. Test brake pressure switch -- not working, replaced with new one. Brake lights, turn signals, running lights, headlights, and dash lights -- all work.	7.5
2/23	Check brake fluid, topped off to fill level. Test drive -- leaking power steering pump observed. Advise remove and rebuild to re-seal. Check transmission fluid, added 1/2 quart. Adjusted points and tested ignition coil -- works fine.	7
2/26	File points in distributor. Found loose connection to the ballast resistor in distributor, replaced connection. Install new sending unit in gas tank.	7
2/27	Install battery hold down. Removed old electric fuel pump -- no longer functioning. Plug existing mounting holes left behind from electric fuel pump. Replace electrical connection to ignition coil. Air up all 4 tires.	3
3/5	Replace fuel sending unit. Test run -- sending unit works.	1
3/29	Removed power steering pump. Disassembled and fully cleaned. Rebuilt with new gaskets and rings from rebuild kit.	3
4/1	Recondition and reconnect the ground and positive wires from the generator.	1.5
4/10	Reinstall power steering pump. Replace generator V-belt. Install new air filter.	2
