Hello Nathan,

thanks for the pictures I have well received.

Only two pictures are still missing to start the research about the historical documentation availability (the research is totally f.o.c.):

- 1) The picture of the chassis number stamped on the left front arm of the frame
- 2) The picture of the engine internal number stamped on the engine block

Please refer to the attachments on my previous email in order to easily find those number on the vehicle.

Could you please be so kind to send me the above requested pictures when possible? Thanks.

Hello Fabio,

We would like to have the most comprehensive information we can get which looks to the certificate of origin and the copies of historical documents. Here is the Chassis # AM 115/074. See photos of engine # and data plate. I have attached a few photos of the car. We are restoring to original which we think was a silver blue color and want to confirm before doing so. We purchased the car from WorldWide Auctioneers in Pebble Beach, CA 2018. Please let me know how to proceed from here. Thank you again.
